Mirah - Apples In The Trees (Cold Cold Water Version)

```
                tom:
                Abm
        E                   Abm        Gb                 Dbm
There should be no hesitation when the coast is clear
E                  Abm        Gb
You got a right to slide right into place when the end is
almost
Dbm
Here
       E                  Abm
So you think you got some rotten deal
       Gb     Dbm
What a way to compromise
E                    Abm               Gb               Dbm
It's a long long way before you get to claim that final prize
E               Abm              Gb            Dbm
Looking at that sorry face i can recognize the fear
E                           Abm             Gb             Dbm
But if you keep on looking up at night the stars will all
appear
E                                Abm
See there's food for me, there's food for you
Gb                          Dbm
There's gold that's in the air
E                       Abm               B           E
There's oceans deep and wide and there is love beyond compare
E                    B
There's apple in the trees
E                      Dbm
Let's take all that we need
E               B
We know what we believe
E                        B
There's hope for you and me
E                  B
My eyes can almost see
E                        Gb
If you fight 'til you're free
                   B    Gb        E
You don't have to wait until you die
                   B    Gb        E
You don?t have to wait until you die
                   B    Gb        E
You don?t have to wait until you die
                   B    Gb        E
You don?t have to wait until you die
```
