

## **2AM Club - Worry About You**

```
Tom: Ab
 (forma dos acordes no tom de G )
Capostraste na 1ª casa
           Gbm
                      Bm
For as long, long as I can remember
                                               Gbm
Its been December, no sun no summertime to treasure
We weren't grown
    Bm
And every time that they told us surrender
It will be better
We'd just go holding on till forever
To what we know
Broken lover yes I made you
Believe that I would be the one to heal you
And if you go now out that doorway
I won't say you're wrong
But you know that I'll worry about you
For as long long as she can remember
She wanted better
No home no one there to protect her, all alone
                         Gbm
And so she told me I was her center
Nothing would tempt her
I still roamed
Just like her father left her, ooh he left her
( D Bm )
           Ε
Broken lover yes I made you
Believe that I would be the one to heal you
```

A E And if you go now out that doorway Bm I won't say you're wrong D Gbm But you know that I'll worry about you
Gbm Isn't it bad you've been a good victim E You thought I was worth it you act like I would listen B
And maybe you were right at one point someday  Dbm  I used to watch you treat the streets like a runway  Gbm  I used to write with tears on your pretty painted face
E Sign language on your back from the first taste Bm So when he whispers in your ear and you think of me Dbm
You wish I would've treated you like you treated me Gbm When you wake up from your dreams to the hallway E Sleepwalking through the streets dressed in all gray
Bm  Blinking streetlamps in the window pane  A  I worried from the second that I learned your name
Gbm Bm Everything in love is light Gb But where was I last night E
And why don't you feel right  A E Broken lover yes I made you Bm D
Believe that I would be the one to heal you  A
I won't say you're wrong  D  Gbm  But you know that I'll worry about you
