

## AC/DC - Can't stand still

Tom: E

Part 1

Part 2

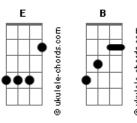

Part 3

Play the parts as

 $1\ 1\ 1\ 1\ 2\ 2\ 1\ 1\ 3\ 1$  over and over for the rest of the song

I'm unsure of the technique to use for this song.

## **Acordes**

One way is to play it with the fingers, using either the thumb and first

finger or the first two fingers to alternate between the strings.  $\boldsymbol{\mathrm{I}}$ 

 $\mbox{don't\ play}$  much fingerstyle and so have a problem getting this way up to

speed. I think this is the correct way to play the song so if its your  $% \left\{ 1\right\} =\left\{ 1\right\} =\left\{$ 

favorite it might be worth the effort to practice this method untill  $% \left( 1\right) =\left( 1\right) \left( 1\right$ 

your up to speed.

The other way is use a plectrum and slightly mute the strings with the  $\ensuremath{\,}^{}$ 

palm of the right hand. Play the  ${\color{blue}B}$  string with upward strokes and the  ${\color{blue}E}$ 

string with downward strokes. I find this method easier but decide for

your
