

Adele - Many Shades Of Black

```
tom:
                                                                Let it out (let it all out) let it all out
Intro: Ab Bb B
                                                                Say what's on your mind
                                                                You can kick and scream
Go ahead, go ahead, go ahead
                                                                And shout and say things
And smash it on the floor
                                                                That are so unkind
Take whatever's left
                                                                Yeah
And take it with you out the door
                                                                Ah
                                                                See if I care
See if I cry
                                                                And see if I stand firm or if I fall
Db
See if I shed a single sorry tear
                                                                Cause in the back of my mind
I can't say that it's been that great
                                                                And on the tip of my tongue
No, in fact it's been a wasted-free year
                                                                Is the answer to it all
[Refrão]
                                                                [Refrão]
Everybody sees
                                                                And everybody sees
And everyone agrees
                                                                And everyone agrees
                                                                That you and I are wrong
That you and I are wrong
And it's been that way too long
                                                                And it's been that way too long
Take it as it comes
                                                                Take it as it comes
And be thankful when it's done
                                                                And be thankful when it's done
There's so many ways to act
                                                                There's so many ways to act
And there's many shades of black
                                                                And there's many shades of black
                                                                Ahm
There's so many shades of black
                                                                There's so many shades of black
There's so many shades of black
                                                                Yeah, there's many shades of black
