

## Alan Walker - Different World (feat. Sofia Carson, K-391 & CORSAK)

```
Tom: Bb
                                                               Been runnin' forever just to end up here once more
 (forma dos acordes no tom de G )
                                                               And now we know
Capostraste na 3ª casa
Intro: Em C D Bm
Em C D Bm
[Verso 1]
                                                               This is not the world we had in mind
All we know, left untold D Bm
                                                               But we got time
Beaten by a broken dream
                                                               We are stuck on answers we can't find
Nothing like what it used to be
                                                               But we got time
[Pré-Refrão]
                                                               And even though we might have lost tonight
We've been chasin' our demons down an empty road
                                                               The skyline reminds us of a different time
                                                               Em C D
This is not the world we had in mind
Been watching our castle turnin' into dust
Escapin' our shadows just to end up here once more
                                                               But we got time
And we both know
                                                               Take me back
[Refrão]
                                                               Back to the mountainside
                                                                Em C
This is not the world we had in mind
                                                               Under the northern lights
                                                               D Bm
Chasin' the stars
But we got time
We are stuck on answers we can't find
                                                               Take me back
                                                                D Bm
  Bm
                                                               Back to the mountainside
But we got time
                                                                        Em
                                                               When we were full of life
And even though we might have lost tonight
                                                                    D
The skyline reminds us of a different time \begin{tabular}{ll} Em & C & D \end{tabular}
                                                               Back to the start
This is not the world we had in mind
                                                               We both know that
But we got time
                                                               [Refrão]
[Verso 2]
                                                                              C
                                                               This is not the world we had in mind
Broken smile, tired eyes
                                                               But we got time
                                                               Em C
D Bm
I can feel your longin' heart
                                                               We are stuck on answers we can't find
Call my name, howlin' from afar
                                                               But we got time
                                                               And even though we might have lost tonight
[Pré-Refrão]
                                                               The skyline reminds us of a different time
We've been fightin' our demons just to stay afloat
                                                               This is not the world we had in mind
Been buildin' our castle just to watch it fall
                                                                Bm
                                                               But we got time
```
