                     tom:
                  Gbm
      Gbm                                 D
    You came out of nowhere
                   E               Gbm
But who could you hold wild horse unstable
                            D    E
Do you still do as you're told
Gbm                                    D
     Think you're wild and you're free now
                      E              Gbm
Think you can cover me, well save yourself
                              D    E
Pretend like you don't do what you're told

[Refrão]

D       Gbm  A      E
  Come around, let me in
        D                      Gbm
How can I talk you down from that ledge
              A   E
Unless you let me in?

[Segunda Parte]

                  Gbm
You heard when I called you
                       D             E
But you still lost your way,  Are you able
   Gbm                      D  E
To do just what you know? Whoa
                Gbm
Taught me to trust now
                  D            E
Yet you have no faith, In yourself
                  Gbm
Why can't you believe in what you know?
```
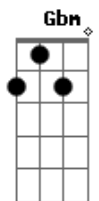

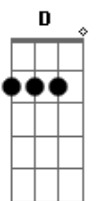

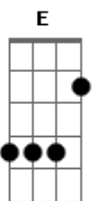

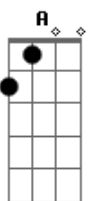

```
        D      E

Unless you let me in?
