

Angel Olsen - Shut Up Kiss Me

```
Tom: G
                                                                Shut up kiss me
                                                                Hold me tight
I ain't hanging up this time
                                                                Stop your crying
I ain't giving up tonight
                                                                It's alright
Even if you walk around
                                                                Shut up kiss me
As though you think you're right
                                                                Hold me tight
At your worst you still believe
                                                                Shut up kiss me
It's worth a fight
                                                                Hold me tight
                                                                G I could make it all disappear D
I could make it go away
Tell me what you think
                                                                You could feed me all of your fears
And don't delay
                                                                We could end all this pain right here
We could still be having some
                                                                We could rewind all of those tears
Sweet memories
                                                                I could take it down to the floor
This heart still beats for you
                                                                You don't have to feel it anymore
Why can't you see
                                                                A love so real that it can't be ignored
                                                                It's all over baby but I'm still young G C D
Shut up kiss me
                                                                   I'm still young
Hold me tight
                                                                Shut up kiss me
Shut up kiss me
Hold me tight
                                                                Hold me tight
Stop your crying
                                                                Shut up kiss me
It's alright
                                                                Hold me tight
Shut up kiss me
                                                                Stop your crying
                                                                It's alright
Hold me tight
                                                                Shut up kiss me
Stop pretending I'm not there
                                                                Hold me tight
When it's clear I'm not going anywhere
                                                                Shut up kiss me
If I'm out of sight then take another look around
                                                                Hold me tight
I'm still out there hoping to be found
                                                                Ooooooooooooh (2x)
Shut up kiss me
                                                                Oooooooooooo (2x)
Hold me tight
                                                                G E (2x)
                                                                C D (2x)
```
