

Angel Olsen - Sister

tom:
Capostrate na 2ª casa
Intro:

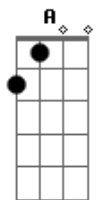

Saw it in her eyes
No it wasn't what she said
She came together like a dream
That i didn't know i had
From the sleepin' life i lead
All the colours i have seen
I cant help but recognise
The brighter one in front of me
Oh the truth i thought i learned
And then it finally came along
Turn around and then its there
All the love i thought was gone

I want to know you
I want to show you
I want to be there
I want to see her
Piece us together
Know its forever
Show me the future
Tell me you'll be there
I want to go where
Nobody knows fear
I want to follow

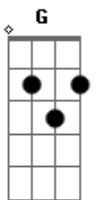

My heart down that wild road
Everywhere i go
I can see your face
Alive and gone at once
Its the way i see this place
And all this blessing was a curse
Before i opened up my heart
You learn to take it as it comes
You fall together, fall apart

I want to know you
I want to show you
I want to be there
I want to see her
Live it through your eyes
Piece us together
Know that this wild road
will go on forever
i want to live life
i want to die right
Next to you
Next to you
Next to you
()
All my life i thought i'd change
