

Arlissa - Let This Go

tom: Will I get my happy ending Will I get this off my chest One chance is all I can get Two hands and nothing but sweat Will I get my act together Or keep fucking up my lines One chance is all I can get I need to say it 'Cause when we're cheek to cheek It's behind my teeth I've been holding onto this too long And it's slipping off my tongue I'm losing control of Oh I have to let this go What I've been afraid of And it just might be my saviour How will I know if If I let you leave alone Oh I have to let this go We have so much fun together Can't fix something that's not broke So I smile and brush it all off Get stuck in all of these thoughts Will you wonder why I'm stalling Do you want to say it too

Go ahead you'd probably do better My head is struggling 'Cause when we're cheek to cheek It's behind my teeth I've been holding onto this too long And it's slipping off my tongue I'm losing control of Oh I have to let this go What I've been afraid of And it just might be my saviour How will I know if If I let you leave alone Dm Oh I have to let this go I pray that I don't make The same mistakes I did before So I keep on waiting Don't know how to say it I hope I don't waste it Hope I let it go I've been holding onto this too long And it's slipping off my tongue I'm losing control of Oh I have to let this go What I've been afraid of And it just might be my saviour How will I know if If I let you leave alone Oh I have to let this go
