Arto Lindsay - Into Shade

```
                         tom:
                    Bm
Intro: Bm7

Bm7                       G7M
   Kiss on the corner of the mouth
Dm7                C              Bm7
   While plants grow strong behind the glass
                         G7M
Proximity is what it is
Dm7           C        Bm7
   And curves repeat to disarray
                                G7M
The roots could grow right through the glass
Dm7              C          Bm7
   But distance also has a ring
              G         Bm7
Glimpses when we turn away
        Em7               Bm7
The elemental can't hold sway
         G              E
Moisture in and moisture out
Bm7          Em7            Bm7
   Nestled in down and beads of sweat
         G         E
Every hour has its day

Em7                          Gbm7
   You shut your eyes to keep me out
Em7           A   A
   But I don't need
           Bm7
To see
Bm7                         Gbm7
   You stand directly in the light
Em7                A   A
   Flush with the door
         Bm7
Then shade

[Solo] Bm7   Gbm7

Bm7                       G7M
   Two scenes that cut together well
Dm7              C          Bm7
   Reflecting things they never say
```
```
                              G7M
Like stripes that gather at the waist
Dm7                C            Bm7
   These streets meet only once a day
                            G7M
These rooms have witnessed brash display
Dm7           C              Bm7
   Now they impress themselves in turn
              G              Bm7
Descending from the highest note
         Em7            Bm7
Taking long and easy strides
            G           E
All the shivers left outside
Bm7          Em7           Bm7
   Astringency has a rich past
         G           E
Now get out of my sight

Em7                          Gbm7
   You shut your eyes to keep me out
Em7           A   A
   But I don't need
           Bm7
To see
Bm7                         Gbm7
   You stand directly in the light
Em7                A   A
   Flush with the door
         Bm7
Then shade
Em7                          Gbm7
   You shut your eyes to keep me out
Em7           A   A
   But I don't need
           Bm7
To see
Bm7                         Gbm7
   You stand directly in the light
Em7                   A   A
   Flush with the door
         Bm7
Then shade

[Final] Bm7   Gbm7
```
