I love you in a messed up way
It makes it difficult to find the words to say
There's not a better time or place

I think I need, think I need a little space
Between your name and my lips I need a space
I send your calls and your kisses outer space
I know I wanted a taste but my senses came back
Now I know I'ma need a little space
You put too much and too little on my plate
Don't wanna b? somebody you're gonna hate
I need your k?y to my place we were movin' too fast
Now I know I'ma need a little space

I'ma need a little
I'ma need a little
We were moving too fast
Now I know I'ma need a little

I know you're heavy on my conscience
And there's nobody sleeping on your pillow side
If you're gonna be my constant
You've got a lot to figure out and so do I
I love you in a messed up way
It makes it difficult to find the words to say
There's not a better time or place

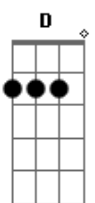

I think I need, think I need a little space
Between your name and my lips I need a space
I send your calls and your kisses outer space
I know I wanted a taste but my senses came back
Now I know I'ma need a little space
You put too much and too little on my plate
Don't wanna be somebody you're gonna hate
I need your key to my place we were movin' too fast
Now I know I'ma need a little space

I'ma need a little (Space)
I need your key to my place
We were moving too fast
Now I know I'ma need a little
I'ma need a little (Space)
I'ma need a little (Space)
I'ma need a little (Space)

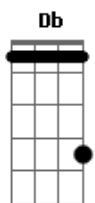

I love you in a messed up way
It makes it difficult to find the words to say
There's not a better time or place

I think I need, think I need a little space
Between your name and my lips I need a space
I send your calls and your kisses outer space
I know I wanted a taste but my senses came back
Now I know I'ma need a little space
You put too much and too little on my plate
Don't wanna be somebody you're gonna hate (Gon' hate, gon' hate)
I need your key to my place we were movin' too fast
Now I know I'ma need a little space
I need a little space
Ooh, ooh, oh
