I can't live a lie
                            tom:
                                                                 Running for my life
Intro: Em
                                                                I will always want you
[Primeira Parte]
                                                                [Refrão]
 We clawed
                                                                I came in like a wrecking ball
We chained our hearts in vain
                                                                    I never hit so hard in love
   Dadd9
We jumped never asking why
                                                                                       G
                                                                 All I wanted was to break your walls
We kissed, I fell under your spell
                                                                                       Em

A love no one could deny
                                                                      Em C7M
