

Avantasia - Lost In Space

tom:

Another star
Has fallen without sound
Another spark
Has burned down in the cold
Another door
To the barren standing unopen
And who was there
To tell me now together and not to go
How could i've known?, how could i've known?
That i'd get lost in space to roam forever
How could i've known?, how could i see?
Feeling like lost in space to roam forever
I'm crawling down
The doorway to the badlands
And kicking down
Are your heart is to the black

And all the damned
Fading in the rearview mirror
When the demons
Are calling me and dragging me away
How could i know?, how could i know?
That i'll get lost in space to run forever
How could i know?, how could i see?
Feeling like lost in space to run forever
Lost in space
Lost in time
Lost in space
How could i
How could i know, how could i know
That i'll get lost in space to run forever
How could i know, how could i see
Feeling like lost in space to run forever
