Backstreet Boys - Darlin

Tom: Bb

Spoken word: Baby, can I talk to you I know something's wrong Things just ain't the same But deep down inside I know you still care So tell me what to do To get things back again The way they used to be If your words have meaning If you really care about me Tell me why can't I find love in your heart If you are my lover Or come as a friend to me Tell me why would you turn away from my love Chorus: So darlin' tell me what to do

to make things right (3x) (Tell me what to do to make things right)

If your words have reasons Then they would turn away from me Trying hard to hide all truth that you might say If you listen to me girl If you know how I'm feeling inside Then maybe, you wouldn't shut me out of your life, baby

Chorus

All I'm asking for is a chance To let me love you

Acordes

Girl you know, with me is where you should be And if I change that we should find That it can be for you and I Then girl I've tried I've tried, oh baby

Chorus

Give anything for your love to be How can I make you mine

Spoken word: Girl you should know how I feel by now There are so many ways to love So just open your heart And I'll find a way

Can't you see All I'm asking for is a chance To let me love you (Can't you see) Girl you know, This is where you should be, ooh, And if I change that we should find That it can be for you and I Then girl I've tried I've tried, oh baby

Chorus

(Oh my darlin')
(I need to know)
(I just wanna know how to make things right)
Baby won't you tell me what to do to make things right (2x)
You gotta tell me girl,
You gotta let me know.
