

Bad Religion - Chronophobia

Tom: F
Intro: Em Em Em Em

Versel:

This rational delusions have got to cease
 The second hand has finally got the vast of me
 I am too aware of singularity
 They brought me to the edge of time
 And it's all is in my mind! Now

Pre-chorus1:

They say the are coming back some day
 The world is turning faster but it just won't wait
 and I'm desperate to try almost anything to evade..

Chorus(2x):

A simple chronophobia
 A simple chronophobia now

Vers2:

Maybe there's a science or technology
 To help me come to terms with my maker
 Since Natural Selection never banged on me
 I must be an exception to the plan
 Someone help me understand! Now

Pre-chorus2:

Cryogenic methods are injectable
 And collagen polymers aren't so terrible
 But they still can't prevent the inevitable...
