Bad Religion - Sanity

There's a watch in my pocket and its hands are broken the face is blank but the gears are turning confusion is a fundamental state of mind it doesn't really matter what I'm figuring out I'm guaranteed to wind up in a state of a doubt
refrao And sanity is a full-time job in a world that is always changing and sanity is a state of mind that you believe in sanity
there's a shadow on the wall where the paint is peeling my body'' s moving foward but my mind is reeling depression is a fundamental state of being it doesn't really mater how my day has turned out I always end up living in this world of doubt
