Bahsi - Let You Go

```
                           tom:
                    Em

          Em7                          A7
There?s something between us
           Bm
I can?t let you go
             B7
Let you go oh oh oh
Em7           A7
I'm in the future saying
       Bm
I miss you so, I miss you so

I miss you so

        Em7
I can?t run away
      A7
I can?t run away
            Bm
There's something really wrong inside
   Em7
I got to say, I
  A7
I got to say
          Bm
You're fooling with my mind

        Em7     A7
Well, I refuse
         Bm
To be somebody I didn't choose
           Em7          A7              Bm
Now it's time, you and I will say goodbye

But I'm singing

Em7                          A7
There?s something between us
          Bm
I can?t let you go
             B7
Let you go oh oh oh
Em7           A7
I'm in the future saying
       Bm
I miss you so, I miss you so
      B7
I miss you though
Em7              A7
I can tell, believe me, these knots
Bm
In time, I?ll say farewell
             B7
```
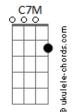

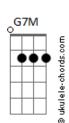

```
But I'm saying
Em7                          A7
There?s something between us
                 Bm
Now I can?t let you go

Let you go

Oh let you go

( C7M   G7M   F7M   B7 )
( Em7   A7   Bm )

                    Em7
I can?t run away
         A7
I can?t run away
                Bm7
There's something really wrong

        Em7    A7
Well, I refuse
          Bm
To be somebody I didn't choose
            Em7          A7              Bm
Now it's time, you and I will say goodbye

But I'm still singing, singing

Em7                          A7
There?s something between us
                Bm
I can?t let you go
                B7
Let you go oh oh oh
Em7           A7
I'm in the future saying
          Bm
I miss you so, I miss you so
                B7
I miss you though
Em7              A7
I can tell, believe me, these knots
Bm
In time, I?ll say farewell
             B7
But I'm saying
Em7                          A7
There?s something between us
                 Bm
Now I can?t let you go

Let you go

Oh let you go
```
