Beady Eye - Ballroom Figured

```
Tom: G
Intro: G   G    Em7 x2

G              G       Em7
Did you ever loan me that song?
G              G       Em7
Did you ever know me at all?
G              G       Em7
You listen to the world going wrong,
G              G       Em7
Looking through a hole in the wall

G              G       Em7
Shovin' our lovin' away,
G              G       Em7
Leaving our light on the side
G              G       Em7
Never once looking to say,
G              G       Em7
We got the ride of our lives

C              D2
Did we ever find a way,
    G               G       Em7
To steer through the cold light of day?
C              D2
Cause we're just passing through,
 A                         C
And it ain't what you done but it is what you do

G              G       Em7
Soon as time comes and goes,
G              G       Em7
Soon on the verge of who knows
G              G       Em7
A sound, we're dancing around
G              G       Em7
```

```
Turn up the music and drown

C              D2
Did we ever find a way,
    G               G       Em7
To steer through the cold light of day?
C              D2
Cause we're just passing through,
 A                         C
And it ain't what you done but it is what you do

        G   G    Em7
Let's go
        G   G    Em7
Let's go

                     Bm
Some people change,
                       C
Move out of range,
                     Bm
All in a day,
        C D2
So long,
D2
So long

G    G    Em7 x2 (repetir estes acordes até o final)

So let's go
Let's go
Let's go
Let's go

Did you ever loan me that song?
Did you ever know me at all?...
```
