

# Bee Gees - My Life Has Been a Song

Tom: G

Sweet simple song of different light and different shades  
 The sound of life erupts and fades and all the world must  
 to play along  
 My life has been a song  
 Here as I sleep, the love I dream will gently creep  
 Inside my heart I softly keep the tune that plays too long  
 My life has been a song

Every sound in my head, every word that I said is like a melody  
 melody  
 That no little person like me could ever change  
 Every sound in the street , all the cold and the heat  
 is like a simphony simphony  
 Wich has never before been rearranged  
 REPETE 2 vezes e termina.
