! This is a very nice old song. The melody is quite haunting and its one of the first songs I learnt to I tried hard to find the notations, tabs or chords for this song on the internet but couldn't find it So i decided to send this. I haven't given the chords and neither the TABS, this is just a plain and simple melody to the song. !

! Its basically using the 3rd, 4th and 5th strings of your guitar, though 2nd IS used at times. You can play it at a higher octave in the piano to get better sounds. !

! I've tried to remove as many half notes as possible without changing the song. This is a much simpler version of the song for all you beginners like myself. !

! This song can be used for research and private purposes only. If you would like to use it for any other purpose,
