Tom: A
Intro: A Dbm D E A E Dbm D E

```
A                             Dbm
These are all my words on paper,
D                           E
Feelings that can't wait till later,
A                E            Dbm    D  E
This is my song for you.
A                             Dbm
When I thought love was hurled,
D                           E
You helped me break the silence,
A                E             Dbm  D  E
Here's my song for you.
             D
And I know we're standing in a
                         E
Hurricane, but I know together

We can find a way.
              A                Dbm
Don't let go, come close,
             D              E
Can you hear my heart?
       A       Dbm     D       E
For you I'm falling deep I'm lost
A           Dbm
In you have found what
D              E
I've been missing.
A           Dbm              D
No one else can feel this space
                          E
Cause no one else can take your

Place.
        A         Dbm
For you I'm falling.
D           E              A    Dbm
