

Bon Jovi - We Can Dance

```
We dance
Intro: E E E E E E E
                                                                To the laughter
I thought miracles were make believe
                                                                To the tears
It's hard to hold what you can't see
                                                                To all those wasted years
                                                                Gbm
                                                                They dissapear
But I found the faith I need
Every morning when you wake up next to me
                                                                 And they got us here
                                                                 Take my hand
If all the shit would take for granted
                                                                with the good fights
Took the train and left us stranded
                                                                And the bad
Make us standing wave goodbye
                                                                Dbm
                                                                with the dreams that we still have
Each night I see the world with brand new eyes
                                                                Looking back on it all baby
And in my heart I hear the music playin'
                                                                We're still standing here
Can you hear it?
                                                                Bridge2:
                                                                D2
Take my hand
                                                                And when the song is over
Chorus:
                                                                We'll still be going on
To the laughter
                                                                Instrumental:
                                                                 E - B - Dbm - A
                                                                 E - B - Dbm - A
To the tears
                                                                Bridge:
Dbm
To all those wasted years
                                                                In my heart I hear the music playing
They dissapear
       Α
                                                                Take my hand
And they got us here
Take my hand
                                                                Chorus:
                                                                We can dance
For the good fights
                                                                To the laughter
And the bad
                                                                To the tears
Dbm
                                                                Dbm
For the dreams that we still have
                                                                 To all those wasted years
                                                                Gbm
Looking back on it all baby
                                                                They dissapear
                                                                         Α
                                                                 And they got us here
We're still standing here
                                                                 Take my hand
Take my hand
We can dance
                                                                 For the good fights
Repeat Intro:
E - E (Se quiser, pode fazer um Lá maior, mas não fica com a
                                                                And the bad
mesma sonoridade)
                                                                 For the dreams that we still have
Verse:
                                                                Looking back on it all baby
Baby lay down next to me
                                                                We're still standing here
I wanna feel each breath you breathe
                                                                Take my hand
        В
In your kiss I taste the truth
                                                                       F
                                                                We can dance
I wanna get all tangled up in you
                                                                       Dbm
                                                                We can dance
In your heart I hear the music playin'
                                                                We can dance
                                                                       Dbm
I can hear it
                                                                We can dance
                                                                       Е
Take my hand
                                                                We can dance
                                                                       Dbm
Chorus:
                                                                We can dance
```
