## Boyce Avenue - Say You Won't Let Go

```
Tom: E
                                                                wave them goodbye
                                                                Fm
                                                                And I'll thank my lucky stars, for that night
 (com acordes na forma de C )
Capostraste na 4ª casa
Intro: G
          Bm
               Em
                                                                When you looked over your shoulder
                                                                For a minute I forget that I'm older
I met you in the dark
                                                                I wanna dance with you right now
Bm
You lit me up
Em
You made me feel as though
                                                                And you look as beautiful as ever
                                                                And I swear that every day'll get better
I was enough
                                                                Em
                                                                You make me feel this way somehow
We danced the night away
Bm
                                                                G
We drank too much
                                                                I'm so in love with you
                                                                Bm
I held your hair back when
                                                                And I hope you know
                                                                Fm
You were throwing up
                                                                Darling your love is more than worth its weight in gold
Then you smiled over your shoulder
                                                                We've come so far my dear
Rm
                                                                Rm
For a minute, I was stone cold sober
                                                                look how we've grown
Em
                                                                                           C
I pulled you closer to my chest
                                                                and I wanna stay with you till we're grey and old
                                                                                       Bm
and you asked me, to stay over
                                                                Just say you won't let go
Bm
I said, I already told ya
                                                                Just say you won't let go
Em
I think that you should get some rest
                                                                I wanna live with you
G
                                                                Rm
I knew I loved you then
                                                                even when we're ghosts
But you'd never know
                                                                you were always there for me
Fm
Cause I played it cool when I was
                                                                when i needed (you) the most
Scared of letting go
                                                                Cause I'm gonna love you till
I know I needed you
                                                                Bm
                                                                My lungs give out
Rm
But I'll never show
                                                                I promise till death we part
I wanna stay with you
                                                                Like in our vows
Until we're grey and old
Say you won't let go
                                                                So I wrote this song for you
Em
Just say you won't let go
                                                                now everybody knows
                                                                that it's just you and me till we're grey and old
I'll wake you up with some
Rm
                                                                G
                                                                                       Rm
breakfast in bed
                                                                Just say you won't let go
I'll bring you coffee with a kiss on your head
                                                                Just say you won't let go
                                                                                        Bm
                                                                Just say you won't let go
I'll take the kids to school
                                                                Just say you won't let go
