

## Calvin Harris - Hard To Love

```
A title, I can't shake it, can't fake it
Intro: Gbm7 D7M G7 D7M
                                                               I guess I'll take it, heartbreaker
                                                                          D7M
I don't like to talk, but I love to sing
                                                               A title, I can't shake it, can't fake it
And I don't smoke, but I love to drink
                                                                     Gbm7
                                                               Baby, I'd rather be hard to love
   G7
I'm paranoid, I don't miss a thing
                                                                                            G#dim7
                                                               Than easy to leave, you should believe me
But I'm still nice, at least that's what I think
                                                                          D7M
                                                               Haven't you needed me?
Gbm7
Fall in love, like I'm a freak
                                                               Gbm7
                                                     D7M
                                                               I'd rather be hard to love
        D7M
                                        G7
But then I pull out, and say, "I need freedom, I need freedom"
                                                               D7M
                                                               Than easy to leave, you should believe me
                                                                          D7M
I guess I'll take it, heartbreaker
                                                               Haven't you needed me?
          D7M
A title, I can't shake it, can't fake it
                                                               Go deeper, go deep
I guess I'll take it, heartbreaker
                                                               I love it when your roots go deep so I know you won't leave
          D7M
A title, I can't shake it, can't fake it
                                                                  G#dim7
                                                               Go deeper, go deep
Baby, I'd rather be hard to love
                                                               I love it when your roots go deep so I know you won't leave
                             G#dim7
                                                                  Gbm7
Than easy to leave, you should believe me
                                                               Go deeper
          D7M
Haven't you needed me?
                                                               I like being ugly, that way if they love me
Gbm7
I'd rather be hard to love
                                                               I know that they love me for real
D7M
Than easy to leave, you should believe me
                                                               I like being ugly, that way if they love me
          D7M
Haven't you needed me?
                                                               I know that they love me for real
Gbm7
                                                               I like being ugly, that way if they love me
'Course you love me, you don't know me
                                                               I know that they love me for real
But I got news for you, I came broken
                                                               I like being ugly, that way if they love me
Ego issues, my head is swollen
                                                               I know that they love me for real
I got a million chips on my shoulder
                                                                  Gbm7 D7M
But if you stick this by all I shoulder
                                                               Go deeper
                      G7 D7M
                                                                  G7 D7M
Maybe you don't need freedom, freedom
                                                               Go deeper
                                                                  Gbm7 D7M
                                                               Go deeper
       Gbm7
I guess I'll take it, heartbreaker
                                                                  G7 D7M
          D7M
                                                               Go deep
```

## **Acordes**
