

Carpe Diem - Careless

```
[Pre-Chorus]
                tom:
                                                               Dbm
Intro: Bm E A D D (2x)
                                                               Tell me how to go
                                                               I can't forgive you
I've been thinking about you
                                                               It?s so hard to forget you
                                                                'Cause I wanna make you stay
And all that we loved and lived and did is kinda crazy
                                                               Tell me how to go
It's been months but years in my head
                                                               Please make this stop
                                                               It?s just that everything?s so slow
Remember the day we met, but now its all we have
                                                               Its causing me to lose control
[Pre-Chorus]
Tell me how to go
                                                               [Chorus]
I can't forgive you
                                                               And I don?t wanna lie
It's so hard to forget you, 'cause I wanna make you stay
                                                               On my bed anymore
Tell me how to go, please make this stop
                                                                'Cause that is where you slept
It's just everything's so slow, it's causing me to lose
control
                                                               By my side, till you?re gone
                                                               And I didn?t realize
[Chorus]
                       Ε
And I don't wanna lie in my bed anymore
                                                               That I?d miss you this much
'Cause there is where you slept
                                                               Seems like you cursed my heart
By my side, till you?re gone
                                                               With your careless touch
And I didn't realized that I'd missed you this much
                                                               [Bridge]
Seems like you cursed my heart
                                                               You gave me the sun, thought it would be bright
With your careless touch
                                                               But now I just feel it burning me alive
[Verse]
                                                               Thought you were the one (thought you were the one)
                                                               Tryna seize the day when you?re not around
Give all my time back
And everything I gave you
                                                               You drowned me so deep, but I couldn?t feel the ground
                                                               Till you leave my mind
All the love and the money I spent with you
                                                               [Solo]
But even so, this feeling's still here
                                                                Bm E A D D (2x)
With no more tears left to cry
                                                               [Final]
"Let's make this clear"
                                                                Bm E A D D
