

Catfish And The Bottlemen - Cocoon

```
C G D Em C G D
Tom: Bb
                                                            And your friends all hated it
(com acordes na forma de G )
Capostraste na 3ª casa
                                                           Fuck it if they talk
Intro: C
                                                                       Em
                                                           Fuck it if they try and get to us
I fell straight into your arms
                                                           Cause I'd rather go blind
Like a drunk who's been on it
                                                                 Em D2
                                                           Than let you down
                 G
All morning, and the sun's up
                                                           Fuck it if they talk
And my head's fucked
                                                                       Em
     Em
                                                           Fuck it if they try and get to us
And immediately I grab you
                                                           Cause I'd rather go blind
You go all red like the first time
                                                                 Em D2
                                                           Than let you down
               Em G
I love it when you do that
God, I love it when you do that. I remember when we...
                                                           And if you wanna shut down and pose as positive
          C
                                                           Hide smoking from relatives and
 Swapped names and I thought maybe
Em C G D
                                                            Rest on me, Honey, that's alright
You'd stay and try and outdrink me
Em C G D Em C G D
                                                                        C
                                                           And if you wanna act more drunk than usual
 And your friends all hated it
                                                           To help you get away with more then
Fuck it if they talk
                                                           Rest on me, Honey, that's alright
           Em
Fuck it if they try and get to us
C D2
                                                           JAM: C C Em Em (2x)
Cause I'd rather go blind Em D2
                                                           Fuck it if they talk
Than let you down
                                                                       Em
                                                           Fuck it if they try and get to us
I cocoon round your shoulders
                                                           Cause I'd rather go blind
                                                                 Em D2
                                                           Than let you down
When you're half cut, and you're frozen
And you've got that visible breathin'
               C G
                                                             I remember when we swapped names and I thought maybe
You're dependin' on me again, I remember when we
                                                                    D2
                                                             You'd stay and try and outdrink me
                                                               G Em D2
 Swapped names and I thought maybe
                                                            Your friends all hated it
Em C G D
 You'd stay and try and outdrink me
                                                           OUTRO: C D G
