

Charli XCX - Doing It

Tom: G

We're staying all night We never slow down.

I think we better do it like we're doing it now.

It's been a long time Since we've been around.

So come on, let's keep doing it like we're doing it Doing it like we're doing it.

Waited so long just to be here

And now we're bringing this back to life, yeah, we're bringing this back to life

Want you to know how I miss ya

And now I got you right by my side, yeah, I got you right by my side

Locked inside my veins you're in my blood, in my blood And we united forevermore.

We're staying all night We never slow down.

I think we better do it like we're doing it now.

It's been a long time Since we've been around.

So come on, let's keep doing it like we're doing it Doing it like we're doing it now

Keep doing it like we're doing it Doing it like we're doing it

Friends like a team in a circle

We're together we're so alive, yeah, together we're so alive

Joy like a jewel let it sparkle

Know that I got your back for life, yeah, I got your back for life

Locked inside my veins you're in my blood, in my blood And we united forevermore.

We're staying all night We never slow down.

I think we better do it like we're doing it now.

It's been a long time Since we've been around.

So come on, let's keep doing it like we're doing it Doing it like we're doing it now

So come on, let's keep doing it like we're doing it Doing it like we're doing it now

Keep doing it like we're doing it Doing it like we're doing it

All night long We dancing to this song.

We doing it, we going on and on, on and on.

All night long We dancing to this song.

We doing it, we going on and on, on and on.

We're staying all night We never slow down.

I think we better do it like we're doing it now.

It's been a long time Since we've been around.

So come on, let's keep doing it like we're doing it Doing it like we're doing it now

So come on, let's keep doing it like we're doing it Doing it like we're doing it now

Keep doing it like we're doing it Doing it like we're doing it
