

Charli XCX - Dying For You

tom:

Ever since I can remember, I've felt it in my bones
 A tragic destiny was reserved for me all on my own
 But, oh, I didn't know why, oh, no, no, I didn't know
 But then I saw your face and realised I was dying for you
 'Cause you're a gun to my head, and you're a wound in my chest
 Yeah, you're my favourite jewellery
 Worn just like a noose 'round my neck

I'm losing gallons of blood, the river's turning to red
 I got a smile on my face, I bleed even more

All the pain and torture that I went through
 All makes sense to me now, I was dying for you
 I was dying for you, I was dying for you
 Even right at the end, I'll keep dying for you
 All the pain and torture that I went through
 All makes sense to me now, I was dying for you
 I was dying for you, I was dying for you
 I'll keep dying for you, I'll keep dying for you

Ever since I can remember, I'd set myself on fire
 And lay down in the road, and wait

To feel the weight of the tires
 But, oh, I didn't know why, oh, no, no, I didn't know

But then I kissed your lips and realised I was dying for you
 'Cause you're the poison I drink, I drink you twice to be sure
 And then I find the highest building, just to fall on my sword
 I'm losing gallons of blood, the river's turning to red
 I got a smile on my face, I bleed even more

All the pain and torture that I went through
 All makes sense to me now, I was dying for you
 I was dying for you, I was dying for you
 Even right at the end, I'll keep dying for you
 All the pain and torture that I went through
 All makes sense to me now, I was dying for you
 I was dying for you, I was dying for you
 I'll keep dying for you, I'll keep dying for you
 Dying, dying, dying, for you, for you, for you
 Dying, dying, dying, for you, for you, for you
 Dying, dying, dying, for you, for you, for you
 Dying, dying, dying, for you, for you, for you
 Dying, dying, dying, for you, for you, for you
 Dying, dying, dying, for you, for you, for you
 Dying, dying, dying, for you, for you, for you

Pain and torture
 Pain and torture
 Pain and torture
 Pain and torture
 Pain and torture
