                  tom:
                   G
Intro:  Em  C  D  Em

        Em                              C
Dancing with your silhouette in the places that we met
D                       Em
Ooh, tryna find you in the moon
       Em                            C
Paris never feels the same, when the streets all call your
name
D                   Em
Ooh, so I hide in crowded rooms

[Pre-Chorus: Leigh-Anne]
       C
And I'll follow right down the river
          Em
Where the ocean meets the sky
     D
To you, to you

Em                        C
Once upon a time we had it all
D                               G
Somewhere down the line we went and lost it
Em                          C
One brick at a time we watched it fall
    D                             G
I'm broken here tonight and darling, no one else can fix me
     Am          D
Only you, only you
       Em                    C
And no one else can fix me, only you
     Am          D
Only you, only you
       Em                    C
And no one else can fix me, only you, oh

Only you

I went following the sun to be alone with everyone
