                   Dm
Intro: Dm  Bb  F  C

Dm
Inglorious soldier I stand 'til the end
                              Bb
A golden revolver I hold in my hand
The trigger that I never squeeze
The war that brings me to my knees
F
I'm tired of fighting for peace
                        C
When I am alone on the front line
I need you to stand next to me

        Dm
Baby, cease fire, fire, fire
           Bb
Throw down your weapons, your weapons, your weapons
            F
I'm on your side, on your side, on your side
          C
So please cease fire, fire, fire
                      Dm
Cease fire, make it stop

Dm
Drop down your defenses, I'm raising my flag
                            Bb
This fighting is hopeless, we need this to end
It's going too far, don't know where it began
                                    F
We're hurting each other and I can't pretend
I'm trying to help you to see
                          C
The casualties that we both leave
It's all so unnecessary
Can't you hear me scream

        Dm
Baby, cease fire, fire, fire (baby, cease fire)
         Bb
Throw down your weapons, your weapons, your weapons
```
