Christopher - Led Me To You

```
                          tom:
                  A
```

```
              Bm                              G
What the hell you talking about love
                                    D
I thought I was doing this for us
                      A
You know I just played my part
   Bm                               G
You said if you leave me for that world
                      D
I won't be here when you return
                              A
But can we just go back to start
```

```
 G
Just hold me and say
           D
You're not leaving this way
         Bm                A
'Cause I'm about to lose my mind
 G
This mess that I made
           D
Don't you say it's too late
         Bm                      A
Can I die in your arms one last time?
```

```
   Bm                                        G
'Cause all my mistakes they led me straight into you
        D                               A
Remember you said to me regret is for fools
   Bm                                G
Crashing and burning like I always do
              D                              A
But all my mistakes they led me straight into you
 G                    A
Yeah they led me to you
```

```
   Bm                                G
It's like losing everything on a bad bet
                              D
I've lost everything but my habits
                    A
I fall so easily
   Bm                                      G
Feels like going right when you should've gone left
                          D
Or the memories I wish I could forget
                    A
```

```
But they're never leaving me
 G
Just hold me and say
                    D
You're not leaving this way
            Bm                A
'Cause I'm about to lose my mind
 G
This mess that I made
              D
Don't you say it's too late
            Bm                      A
Can I die in your arms one last time?
```

```
   Bm                                        G
'Cause all my mistakes they led me straight into you
        D                               A
Remember you said to me regret is for fools
   Bm                                G
Crashing and burning like I always do
              D                              A
But all my mistakes they led me straight into you
```

```
                         G
I'm messed up like I do
                    D
But regret is for fools
                        Bm
Now I praise my mistakes
                    A
'Cause they led me to you
```

```
                         G
I'm messed up like I do
                    D
But regret is for fools
                        Bm
Now I praise my mistakes
                    A
'Cause they led me to you
 G                    A
Yeah they led me to you
```

```
   Bm                                G
What the hell you talking about love
                                    D
I thought I was doing this for us
                      A
You know I just played my par
```
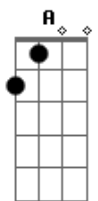

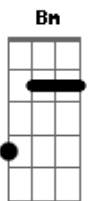

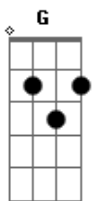

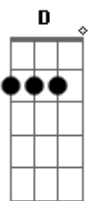

Acordes

A   Bm   G   D
