

## Cimorelli - Wings

```
Intro: C G Dm F
                                                                When I was out there on my own,
                                                                You gave me wings and brought me to life,
I can be so negative sometimes
                                                                And now I need to know
My own worst enemy sometimes
                                                                If you wanna fly, cause I wanna fly (yeah)
Even at my lowest low, you still had hope,
                                                                Tell me you're down for touching the sky (yeah)
When I wanna quit, you won't let me
                                                                You and me, me and you, the higher, the better,
When I'm falling down, you gon'catch me,
You pick me up, yeah, you fix me up
                                                                When we fly, we fly together, together, together, together,
Now I'm on my way and I'm strong enough to say
                                                                When we fly, we fly together.
                                                   G
You gave me wings, and taught me to fly
                                                                I can be so negative sometimes
When I was out there on my own,
                                                                My own worst enemy sometimes
You gave me wings and brought me to life,
                                                                Even at my lowest low, you still had hope
And now I need to know
If you wanna fly, cause I wanna fly (yeah)
                                                                When I wanna quit, you won't let me
Tell me you('re) down for touching the sky (yeah)
                                                                When I'm falling down, you gon'catch me,
You and me, me and you, the higher, the better,
                                                                You pick me up, yeah, you fix me up
                                                                Now I'm on my way and I'm strong enough to say
When we fly, we fly together, together, together, together,
together
                                                                                                                         G
                                                                You gave me wings, and taught me to fly
When we fly, we fly together.
                                                                When I was out there on my own,
I feel like a prisoner locked up,
                                                                You gave me wings and brought me to life,
The only key to set me free is your love,
                                                                And now I need to know
You went and took a chance on me,
                                                                If you wanna fly, cause I wanna fly (yeah)
                                                                Tell me you('re) down for touching the sky (yeah)
Without a reason to believe.
When I wanna quit, you won't let me
                                                                You and me, me and you, the higher, the better,
When I'm falling down, you gon'catch me,
                                                                When we fly, we fly together, together, together, together,
You pick me up, yeah, you fix me up
Now I'm on my way and I'm strong enough to say
                                                                When we fly, we fly together, together, together, together,
                                                                forever
You gave me wings, and taught me to fly
                                                                When we fly, we fly together.
```
