

City And Colour - We Found Each Other In The Dark

Tom: G

I heard the church bells from afar
 But we found each other in the dark
 And when the smoke does finally pass
 We will rise above all the ash
 Cause we're gonna live
 We're gonna live
 We're gonna live
 We're gonna live
 We're gonna live
 We're gonna live
 We're gonna live
 We're gonna live
 We're gonna live at last
 So bright the flames burn in our hearts
 That we found each other in the dark
 Like bees out in the wilderness
 We are fighting to survive and come over this

Cause we're gonna live
 We're gonna live
 We're gonna live
 We're gonna live
 We're gonna live
 We're gonna live
 We're gonna live
 We're gonna live like the rest
 Through the black starless water
 And the cold lonely air
 All the rough restless sea
 The vessel in deep disrepair
 And I swore they started singing
 But they wont rejoice
 I can still hear your voice
 And I heard the church bells from afar
 But we found each other in the dark
