

## Clean Bandit - Baby (feat. Marina And The Diamonds & Luis Fonsi)

```
Tom: C
                                                                You were wild, couldn't get enough
                                                                Let's leave things the way they were
                                                                You'll stay with me like a lullaby
            C
                                     Bb
Se que te gusto a ti todavia
                                                               Ay, sé que te gusto a ti todavía por mucho que digas
Tres. dos. uno
                                                                Además puedo ver en tus ojos
Standing here in an empty room
                                                                Que no solo quieres quedar como amigos
I saw you there and my blood ran cold
                                                                Cm
                                                                                    Bb
                                                                Tienes mi corazón, eres mi obsesión
Take me back to that long september
                                                                Soy tuyo pa' siempre
I don't know how I ever let you go
                                                                Guess I had my last chance
I was young, didn't know 'bout love
                                                                And now this is our last dance
You were wild, couldn't get enough
                                                                You fell through the cracks in my hands
Gave my heart to another lover
                                                                                Cm G
                                                                Tell myself "Be stronger"
                                                                              Bb Eb
Don't know how I ever let you go
                                                                My heart's like a rubber band
                                                                                Ab7M
Find me, in another place and time
                                                                And it's such a shame
If only, if only you were mine
                                                                You'll always be the one who got away
    Eb
                  G7
But I'm already someone else's baby
                                                                We both know deep down you feel the same
                                                                                 Cm G
Guess I had my last chance
                                                               Hard to say it's over
And now this is our last dance
                                                                But I'm already someone else's
                                                                Cm7 Rh
You fell through the cracks in my hands
                                                                Baby, ooh
Hard to say it's over
                                                                Gm7
                                                                Baby, whoa
     Cm
But I'm already someone else's
                                                                     Bh
                                                                Cm7
                                                                Baby, ooh
Cm7
     Bh
Baby, ooh
                                                                But I'm already someone else's
Gm7
    Ab7M
Baby, whoa
Cm7
     Bb
Baby, ooh
                                                                Wish I met you at another place and time
                                                                             Ab
                                                               If only, if only you were mine
But I'm already someone else's
                                                               This love story ends for you and I
All caught up in the way we were
                                                                'Cause I'm already someone else's
I feel your hands getting close to mine
                                                                Cm7
                                                                     Bb
                                                                Baby, ooh
Don't say the words that I love to hear
                                                                Gm7
                                                                Baby, whoa
The beat goes on and I close my eyes
                                                                Cm7 Bb
                                                                Baby, ooh
I was young, didn't know 'bout love
                                                                But I'm already someone else's
```
