[Primeira Parte]
                                                                 [Terceira Parte]
It's a reoccurring memory
                                                                When my runnin' days are over
Familiar old refrain
\ensuremath{\text{Am}} If I'd have been born a hundred years
                                                                My work on Earth is through
                                                                 I hope the words I sang brought peace
This bus would be a train
                                                                And melodies rang true
And I'm runnin' like I'm wanted to a
                                                                 And no longer I'll be wonderin'
                                                                              Dm
Place that feels more free
                                                                Where all this wonderin' might lead
                                                                       Am

I suppose I'm one of those
                                                                 There's a fire that burns inside of me
                                                                        E7
That are born to run
                                                                And it's you that feeds the flame
                                                                       F
Believin' that there'd never, ever
                                                                Well, I go to bed a-dreamin'
