

Coldplay - Up&Up

```
Intro: G D Em C (x2)
                                                               Just need love, just need love
                                                               When the going is rough, saying
Fixing up a car to drive in it again
                                                               We're gonna get it, get it together
Searching for the water, hoping for the rain
                                                               I know we're gonna get it, get it together somehow
Up and up, Up and up
                                                               We're gonna get it, get it together and flow
Down upon a canvas, working with a wheel
                                                               We're gonna get it, get it together
Waiting for a chance to pick your orange peel
                                                               I know, we're gonna get it, get it together and flow
Up and up, Up and up
                                                               We're gonna get_it, get it together and go up
See a performer, a diamond in the rough
                                                               Cause you can say what is, power through it
See a bird soaring high above the flood
                                                               Close your mind and clench your fist
It's in your blood, It's in your blood
                                                               You can change minds, take the risk
Underneath the storm an umbrella is saying
                                                               Or see each soul like happiness
                                                               Solo 1: ( G D Em C ) (x2)
( G D F C ) (x2)
Sitting with the poison takes away the pain
Up and up, Up and up
We're gonna get it, get it together
I know we're gonna get it, get it together somehow
We're gonna get it, get it together and flow
We're gonna get it, get it together
I know, we're gonna get it, get it together and flow
                                                               We're gonna get it, get it together
We're gonna get it, get it together and go
                                                               I know we're gonna get it, get it together somehow
             G D Em C
Up and up and up
                                                               We're gonna get it, get it together and flow
                                                               (x2)
Drowning in the study emptying the moon
                                                               We're gonna get it, get it together
                                                               I know, we're gonna get it, get it together and flow
Trying to empty out the ocean with a spoon
Up and up, Up and up
                                                               We're gonna get it, get it together and go
                                                               Up and up and up
How can people suffer? How can people part?
How can people struggle? How can people break your heart?
                                                               Solo 2 (4x): (GDFC)
break your heart?
Yes I wanna know, show me how to feel
                                                               (GDEmC)
Yes I wanna go, show me how to heal it up
I healed it up
                                                               Fixing up a car to drive in it again
                                                               When you're in pain, when you think you've had enough
I'm trying to see the forest staring at every seed
                                                                               G
                                                                                   D Em C
                                                               Don't ever give up
                                                                Am G
Just believe in love
Angels in the marble waiting to be free
                                                                                        ( G )
