

## **Conan Gray - Astronomy**

```
I'd fall back in love
                           tom:
                                                             You said "distance brings fondness"
Intro: G D Em D C
                                                             But guess not with us
[Primeira Parte]
                                                               G D
                                                                              Em
                                                             The only mistake that we didn't make
We drive through the woods \operatorname{Em} \qquad \operatorname{D} \qquad \operatorname{C}
                                                             Was run (now look what we've done)
Rich neighborhoods to watch
                                                             [Refrão]
        D
We joked as we looked that Em D C
                                                             We've traveled the seas
                                                               Em
They were too good for us
                                                             We've ridden the stars
 G D
'Cause socially speaking
                                                             We've seen everything
Em D
We were the same
                                                             From Saturn to Mars
                                                              G D
                                                             As much as it seems like you
With runaway fathers and mothers
                                                                D
Who drank
                                                             Own my heart
           D Em
A tale old as time, young love
                                                             It's astronomy, we're two worlds apart
                                                            G D Em D (It's astronomy)
Don't last for life
         Em
And now I know, now I know
                                                             We're two worlds apart
           Em
It's time to go, it's time to go
                                                             [Ponte]
[Refrão]
                                                             Stop tryna keep us alive
We've_traveled the seas
                                                             You're pointing at stars
  Fm
        D
E've ridden the stars
                                                             In the sky that already died
We've seen everything
                                                             Stop tryna keep us alive
                                                             You can't force the stars
From Saturn to Mars
       D
As much as it seems like you
                                                             To align when they've already
  D
                                                             G D Em D C
                                                            Die ____u G D Em D
Own my heart
It's astronomy, we're two worlds apart
                                                             Oh we've die _{\_\_}d, oooh-ooooh
                                                             Ooh-ooh-oooh
          (It's astronomy)
We're two worlds apart
                                                             [Refrão final]
G D Em D
           (It's astronomy)
We're two worlds apart
                                                             Oh we've traveled the seas
                                                              Em D
[Segunda Parte]
                                                             We've ridden the stars
        D Em
                                                             We've seen everything
From far away, I wish
                                                             From Saturn to Mars
I'd stayed with you
          D
                    Em
                                                             As much as it seems like
But here face to face, a stranger
                                                             You own my heart
   D C
That I once knew
                                                                r
                                                             It's astronomy, we're two worlds apart
I thought if I wandered
Acordes
