

## **Corey Taylor - Snuff**

```
But all of that was ripped apart when you refused to fight
m (forma dos acordes no tom de Am )
                            Afinação: D G C F A D [Intro] Am So save your breath, I will not hear
                                                               I think I made it very clear
                        Em F
Am
                                                               You couldn't hate enough to love
Bury all your secrets in my skin
                                                               Is that supposed to be enough?
Come away with innocence, and leave me with my sins
                                                               I only wish you weren't my friend
The air around me still feels like a cage
                                                               Then I could hurt you in the end
                                                               I never claimed to be a Saint
And love is just a camouflage for what resembles rage again
                                                               Ooh, my own was banished long ago
(Am Em F)
                                                               It took the Death of Hope to let you go
So if you love me, let me go
                                                               (Am Em F)
And run away before I know
                                                               So break yourself against my stones
My heart is just too dark to care
                                                               And spit your pity in my soul
I can't destroy what isn't there
                                                               You never needed any help
Deliver me into my fate
                                                               You sold me out to save yourself
If I'm alone I cannot hate
                                                               And I won't listen to your shame
I don't deserve to have you
                                                               You ran away - you're all the same
Ooh, my smile was taken long ago
                                           Am Fm F
                                                               Angels lie to keep control
If I can change I hope I never know
                                                               Ooh, my love was punished long ago
I still press your letters to my lips
                                                               If you still care, don't ever let me know
                            Em F
                                                                                                  Am
                                                               If you still care, don't ever let me know
And cherish them in parts of me that savor every kiss
                        Em
I couldn't face a life without your light
                                                               [Final] Am Em F
                                                                       Am
```

## **Acordes**
