

Cream - Nsu Live

Tom: G Then it goes back to the intro verse lick.

This is all of the song but the Lead part in the middle, that V V V V V V V

it is a little to hard to tab
it is extensive, I will say that it is played in the key of A,
mostly on minor scales,
he uses a few blues licks with it that are commenly used. Now
the tab.

Then back into chorus lick.

----- But on the second time around it's a little different.
----- V V

Tabbed by:General Tildor
Email:E

Tuning:standard
Intro: and verse lick.

There is a blues style overdrive on the guitar.
V V V V V V V

It goes back to intro lick and stuff. The solo lasts about 2-3 minutes long and is in key of A, mostly blues stuff. A little to much to tab right now. But the rest of the song mostly intro/verse lick and the first chorus lick. Listen to the song, the live version, to get the tempo right.

It does that several times before the verse, after the first verse he goes into this.

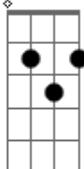

Chorus lick. He strums this for four beats each chord, then a blues lick.

V V
