I just left the party with a girl that said she doesn't want
I feel out of body the way the world keeps wishing death upon
Take it away, feel it now (Ooh)
               Am
Red all in the face, don't calm me down
'Cause every time the sun comes up I start feeling worthless \stackrel{\text{C}}{\text{C}}
It's easier said than done, I'm trying to find my purpose
               C
                        Am Em
I should've ran away by now
            C
But I can't escape this town
```
