

Dan + Shay - Alone Together

Tom: **Ab**

(forma dos acordes no tom de **G**)
Capostrate na 1ª casa

I couldn't help but notice you were sitting by yourself

Dropping limes in a Corona like

You're trying to get over somebody else

It's funny how you're story sounds a little like mine

Oh, cause' I've been at a table with a

Bottle peeling labels to pass the time

We can be blue eyes and neon light

Singing them sad up songs all night

We can say goodbye, just head home

But, if we're going to be alone

We should be alone together

Kissing over there in the corner where nobody else can see

Keeping each other company

We should be alone together

Leaning up against my car door

Parked outside on the street, where it's just you and me

We should be alone together

I couldn't help but notice you could use another drink

Yeah, I don't wanna leave ya

And it's two for one Tequila so what you think?

We can be blue eyes and neon light

Singing them sad up songs all night

We can say goodbye, just head home

But, if we're going to be alone

We should be alone together

Kissing over there in the corner where nobody else can see

Keeping each other company

We should be alone together

Leaning up against my car door

Parked outside on the street, where it's just you and me

We should be alone together

We should be alone together

We should be alone together, oh yeah

We should be alone together

Over there in the corner where nobody else can see

We should be alone together

Kissing over there in the corner where nobody else can see

Keeping each other company

We should be alone together

Leaning up against my car door

Parked outside on the street, where it's just you and me

We should be alone together

We should be alone together

We should be alone together, oh yeah

We should be alone together
