

## **Demi Lovato - This Is Me**

```
Tom: D
                                                               Even though it seems
   (afinação 1/2 tom abaixo)
                                                               Like it's too far away
(intro) (riff se toca no inicio e no primeiro verso)
                                                               I have to believe in myself
                                                               It's the only way
                                                               (chorus) Same ss before
I've always been the kind of girl
                                                               This is real, this is me
That hid my face
                                                                        Bm
                                                               I'm exactly where I'm supposed to be, now
So afraid to tell the world
                                                               Gonna let the light, shine on me
What I've got to say
                                                               Now I've found, who I am
But I have this dream
                                                               There's no way to hold it in
Right inside of me
                                                               No more hiding who I want to be
I'm gonna let it show, it's time
                                                               This is me
To let you know
                                                               (solo)
To let you know
                                                               You're the voice I hear inside my head
(refrão)
                                                               The reason that I'm singing
                                                               I need to find you, I gotta find you
                                                               You're the missing piece I need
This is real, this is me
                                                               The song inside of me
                                                               I need to find you, I gotta find you
I'm exactly where I'm supposed to be, now
Gonna let the light, shine on me
                                                               This is real, this is me
Now I've found, who I am
                                                               I'm exactly where I'm supposed to be, now
There's no way to hold it in
                                                               Gonna let the light, shine on me
            G A
No more hiding who I want to be
                                                               Now I've found, who I am
This is me
                                                               There's no way to hold it in
(riff 1)
                                                                           G
                                                               No more hiding who I want to be
(verso 2)
                                                               This is me
                                                               (Mesmos acordes)
                                                               You're the missing piece I need
                                                               The song inside of me (this is me)
                                                               You're the voice I hear inside my head
Do you know what it's like
                                                               The reason that I'm singing
                                                               Bm
                                                               Now I've found, who I am
To feel so in the dark
            G
To dream about a life
                                                               There's no way to hold it in
                                                                               G
Where you're the shining star
                                                               No more hiding who I want to be
                                                               This is me
```
