                E                 [Intro] E  D  G  A  A

[Primeira Parte]

E             D    G           A
I should've taken my own advice
                             E
And say goodbye to you before
           D       G            A
I let you make your bed in my mind
                               E
While I was sleeping on the floor

[Pré-Refrão]

                D              Bm
Surrounded by all of your doubts
      A
So loud, your mouth is vicious and you're proud
         E                       D          G
Of the sound you make every second I'm awake
        A
Every second I'm around
                                 E   E
Go back to hanging with your crowd

 A              B             E
(Everybody, drown it out now!)

[Refrão]

          E
Now it's over
        D
Cold shoulder
             G             D            E
You can scream to my face on a poster
'Cause you lash out
               D
Like it's closure
       G                          E
Baby, I don't even know if I know ya
D       G            Gb            E
  Baby I don't even know if I know ya

[Segunda Parte]

E                        D          G
  I bummed a cigarette on 28th street
            A
Girl, you walk up to me, cherry red and looking angry
E                                    D          G
  Saying something like "Blah, blah, blah, who do
                    A
 You think you ar??"
First time it got to my head
                              E
Now I just laugh it out
