

# Duda Sings - Memories

tom:

C

I remember all from that night

We were driving through the city lights

I took your hand and you said it's alright

Never thought you could lie to my eyes

C Safe and sound from the problems around

Didn't know you were the biggest I'd found

Guess one could say that you had it your way

I'll always be the one that got away

C And I

Dm Thought I could trust you with my life

You were the one who made it right

Through dusk and dawn thought you were by my side

C And memories flow back into my mind

As I walk through the streets where you once called me 'mine'

Oh no, I can't go home, I'll feel alone

As the thought of you comes back

C Memories flow back into my life

As I walk through the streets where you once called me 'mine'

Oh no, I tried to move on, but I'm still caught on

As the memories rush back

Dm I often think if i'm free or just lonely

You made me feel like the only one

Later I found things I couldn't see

Am Told other girls the same three words you told me

C Sometimes I wonder if you've ever known

Am All the times that I felt alone

C I could feel your lies through my bones

Am My heart's so full of you that I can't call it my own

C And I

Dm Thought I could trust you with my life

G Took some time to see the light

Through dusk and dawn had to deal it on my own

C And memories flow back into my mind

Am As I walk through the streets where you once called me 'mine'

C Oh no, although you let go, I'll always know

G As the thought of you comes back

C Memories flow back into my life

Am As I walk through the streets where you once called me 'mine'

C Oh no, I called your phone, but you were gone

G As the memories rush back

C Took some time to see that it's all done

Am I just missed the you that I was the one

C Oh, he's stuck in the past

Am I can't get him back

G The memories all that I have

C Memories flow back into my mind

Am As I look for that person frozen in time

C Oh no, I'll still pretend

Am It's not the end

G I guess until we meet again
