

## Ed Sheeran - End Of Youth

```
But pretend it's all alright
                            tom:
                                                               All my ups led to falls
               Cm (forma dos acordes no tom de Am )
Capostraste na 3º casa
                                                               That led to trying to end my life
           [Primeira Parte]
                                                               Just a boy at the start
                                                               That you leant on like a man
I've been depressed since you left
                                                               You were meant to be my friend
Tried to the fill the hole with wine
                                                               And not to take all that you can
Stopped the drugs when she came
                                                               Disengage to create
Cleaned my act up overnight
                                                               Gotta reinvent the wheel
If you reach with no reply
                                                               No one knows what they want
I'll see you when I see you, man
                                                               I'll just give you what I feel
You can't talk me through
                                                               If I slip and get high
The fall if we don't know if I can land
                                                               I know the low is always near
I try to grow but the past
                                                               When I'm down I never see you
It tears me down to size
                                                               When I'm up you won't appear
Tell the world how to process
                                                               [Pré-Refrão]
But don't take the same advice
                                                                           Am C G
I remember what I say
                                                               It's been a long year
That the morning's filled with fear
                                                               And we're not even halfway there
Can't get a handle of my grief
                                                               [Refrão]
When every memory turns to tears
                                                               Is this the ending of our youth
[Pré-Refrão]
                                                               When pain starts taking over
It's been a long year
                                                               I just don't know if I can ever
And we're not even halfway there
                                                               Just let it go
[Refrão]
                                                               Everything's falling apart
                                                               When love is real there's never closure
Is this the ending of our\_youth
                                                               I guess it's all part of life
When pain starts taking over
                                                               But I can't help but feel low
Just don't know if I can ever
                                                               We spend our youth with arms
Just let it go
                                                               And hearts wide open Dm
Everything's falling apart
                                                               And then the dark gets in
When love is real there's never closure
                                                               And that's the end of youth
I guess it's all part of life
                                                               But I can't help but feel low
We spend our youth with arms
                                                               [Pré-Refrão]
And hearts wide open
                                                                           Am C G
                                                               It's been a long year
And then the dark gets_in
                                                               And we're not even halfway there
And that's the end of youth
                                                               [Refrão]
[Segunda Parte]
                                                               Is this the ending of our youth
I've been lost since the tears
                                                               When pain starts taking over
```
