Intro:

[Verse 1]
```
                    Em                         Em
I was born inside a small town, I've lost that state of mind
                              C
D
Learned to sing inside the Lord's house but stopped at the age
of nine
                Em                       Em
I forget when I get awards now the wave I had to ride
                  C                                    D
The paving stones I played upon, they kept me on the grind

                Em                       Em
So blame it on the pain that blessed me with the life
                          C
D
Friends and family filled with envy when they should be filled
with pride
                Em                              Em
And when the world's against me is when I really come alive
                  C                                  D
And everyday that Satan tempts me, I try to take it in my
stride

                    Em                          Em
You know that I've got whisky with white lines and smoke in my
lungs
        C                              D
I think life has got to the point I know without it's no fun
        Em                       Em
I need to get in the right mind and clear myself up
              C                         D
Instead, I look in the mirror questioning what I've become

                Em                       Em
I guess it's a stereotypical day for someone like me
            C                         D
Without a nine-to-five job or an uni degree
        Em                              Em
To be caught up in the trappings of the industry
                        C                      D
They showed me the locked doors I find another use of key, and
you'll see
```

[Pre-Chorus 1]
```
C           G              D              Am
  I'm well aware of certain things that can destroy a man like
me
C           G              B7           Em
  But with that said give me one more, higher
```

[Chorus 1]
```
  C           D           Em
Another one to take the sting away
        C           D           Em
I am happy on my own, so here I'll stay
          C           D           Em
Save your lovin' arms for a rainy day
                  C           D
And I'll find comfort in my pain eraser
```

[Verse 2]
```
Em                                Em
I used to think that nothing could be better than touring the
world with my songs
              C                            D
I chased the picture perfect life, I think they painted it
```

wrong
```
              Em                          Em
I think that money is the root of evil and fame is hell
C                                    D
Relationships and hearts you fixed, they break as well
        Em                       Em
And ain't nobody wanna see you down in the dumps
                    C                            D
Because you're living your dream man, this shit should be fun
                          Em                            Em
Please know that I'm not trying to preach like I'm Reverend
Run
              C                          D
I beg you, don't be disappointed with the man I've become

              Em                          Em
Our conversations with my father on the A14
C                                    D
Age twelve telling me I've gotta chase those dreams
          Em                       Em
Now I'm playing for the people, dad, and they know me
              C                            D
With my beat and small guitar wearing the same old jeans

                Em                       Em
Wembley Stadium crowd two hundred and forty thou
                      C                   D
I may have grown up but I hope that Damien's proud
              Em                       Em
And to the next generation, inspiration's allowed
                C                              D
The world may be filled with hate but keep erasing it now,
somehow
```

[Pre-Chorus 2]
```
C           G              D              Am
  I'm well aware of certain things that will befall a man like
me
C           G              B7           Em
  But with that said give me one more, higher
```

[Chorus 2]
```
  C           D           Em
Another one to take the sting away
        C           D           Em
Oh I am happy on my own, so here I'll stay
          C           D           Em
Save your lovin' arms for a rainy day
                  C           D           Em
And I'll find comfort in my pain eraser
                  C           D           Em
And I'll find comfort in my pain eraser
                  C           D
And I'll find comfort in my pain eraser
```

[Bridge]
```
Em  Em                    C  D
    Welcome to the new show, I guess you know I've been away
Em      Em                      C       D
    But where I'm heading who knows, but my heart will stay
the same
Em  Em                    C  D
    Welcome to the new show, I guess you know I've been away
Em      Em              G       C
    But where I'm heading who knows, my pain eraser
```

[Outro]
```
Em          C         D
    And I'll find comfort in my pain eraser
Em          C         D
    And I'll find comfort in my pain eraser
Em          C         D
    And I'll find comfort in my pain eraser
Em          C         D
    And I'll find comfort in my pain eraser
```
