

Elvis Presley - Trouble/guitar Man

```
Tom: G
                                                                     For the next three weeks I went huntin' them nights,
                                                                     Just lookin' for a place to play,
   Standard tuning.
Riff 1:
                              Riff 2:
                                                                     Well, I thought my pickin' would set 'em on fire,
Intro: (Riff 1)
                                                                         G7
                                 (Riff 2)
                                                                     But nobody wanted to hire a guitar man.
                                                                     Well, I nearly 'bout starved to death down in Memphis,
    If you're looking for trouble
                                (Riff 1)
                                                                     I run outta money and luck,
    You came to the right place
                                                                     So I bought me a ride down to Macon, Georgia,
                                                                     On a overloaded poultry truck,
    If you're looking for trouble
                                                                     I thumbed on down to Panama City,
                              (Riff 1)
                                                                     Started pickin' out some o' them all night bars,
    Just look right in my face
                                                                     Hopin' I could make myself a dollar, Makin' music on my guitar,
    I was born standing up
                                                                     I got the same old story at them all night piers,
                    (Riff 1)
                                                                     There ain't no room around here for a guitar man
    And talking back
                                                                     We don't need a guitar man, son
    [NC]
                                                                     So I slept in the hobo jungles,
    My daddy was a green-eyed mountain jack
                                                                     Roamed a thousand miles of track,
                                                                     Till I found myself in Mobile Alabama,
    Because I'm evil, my middle name is misery
                                                                     At a club they call Big Jack's,
                                                                 A little four-piece band was jammin'
                      (tacet)
             G7 F
    Well I'm evil,
                      so don't you mess around with me
                                                                     So I took my guitar and I sat in,
                                                                       E7
    (Play a couple of times a C chord. Then go to the key of D
                                                                     I showed 'em what a band would sound like,
                                                                            Α7
                                                                     With a swingin' little guitar man.
                    D7
                                                                     Show 'em, son
    Well, I quit my job down at the car wash,
                                                                     If you ever take a trip down to the ocean,
                                                                     Find yourself down around Mobile,
           D7
                                                                     Make it on out to a club called Jack's,
    Left my mama a goodbye note,
                                                                     If you got a little time to kill,
    By sundown I'd left Kingston,
                                                                     Just follow that crowd of people,
                                                                     You'll wind up out on his dance floor,
                                                                     Diggin' the finest little five|-piece group,
    With my guitar under my coat,
                                                                     Up and down the Gulf of Mexico,
                                                                     Guess who's leadin' that five|-piece band,
    I hitchhiked all the way down to Memphis,
                                                                     Well, wouldn't ya know, it's that swingin' little guitar
    Got a room at the YMCA,
            D7
