Intro:

[Primeira Parte]

     F
As fast as a speeding building
       C
Can leap over bullets with kevlar shoes
                   F
And though I have no loco motives
       C
I'd gladly lift a train to save her caboose
   F
I am strong, I am fearless
         C
Not a single flaw in a single part

[Pré-Refrão]

       E
Except for one weakness
         E
My achilles heel
   Am                F
A cursed kryptonite heart

[Refrão]

        E
Get out of my heart
              Am
I'm heading back to the start
     F          G         Am
Oh damn, this kryptonite heart
     F          G         C
Oh damn, this kryptonite heart

[Segunda Parte]

F
I had a dream that you loved me
C
I had a dream that you still gave a damn
F
I had a dream of defeating
   C
An army of tears with the strength in my hand
F
In this dream oh so fleeting
   C
I swear my heart was still beating, oh but

[Pré-Refrão]

E
I woke up
Am
I woke up
Am                      F

[Ponte]

            F
This super strength and super speed,
        C
They make me think that probably
F
I should be much more intrigued
       C
By serious, more grown-up things
            F
But here again, I'm stuck instead
          C
On why butterflies and supermen
       E
Cannot be good, good friends again
     Am                   F
Oh will this trip ever end?

[Refrão]

        E
If I play my part
            Am
Can I go back to the start
     F       G       Am
Will you release my heart?
     F       G       Am
Will you release my heart?
     F       G       Am
Will you release my heart?
     F       G       Am
Will you release my heart?
     F       G       Am
Will you release my heart?
(I think maybe I tried too hard)
     F       G       Am
Will you release my heart?
(I think maybe I tried too hard)
     F       G       Am
Will you release my heart?
(I think maybe I tried too hard)
     F       G       Am
Will you release my heart?
(I think maybe I tried too hard)
F    G             Am
(It only made us drift apart)
F    G             Am
(I think maybe I tried too hard)
