Eric Johnson - Desert Rose

Tom: E

```
                                         dist w/ delay                    feedback

    DESERT ROSE

From the 1990 album ?Ah Via Musicom?.
                                                           chords - 2nd git
      p  - pull off                                                     2:05
      h  - hammer on
      T  - use your thumb
    ~~  - sustained note or vibrato
     /  - slide up                              2:09
     \  - slide down
     b  - bend to second note
  ?b?r? - bend to second note and return to first
     PH - pinch harmonic                               2:17
    (?) - passing note

I haven't put in any precise timing so you'll have to listen
to the CD. Usually
if the notes are closer together they'll be faster but this is
only a rough guide.
It's hard to tell where there are hammer ons and pull offs are Final chorus lead - 2:54
so you can decide
for yourself. This tab is definitely correct. I worked the
solos out using "pacemaker"                        ?My desert rose, born are the few,?
for winamp to slow it down.
Enjoy!                                             ?Always with me,?

Verse/intro riff - 0:00
                                                    ?A vision of you,?        ?So, don?t fade away.?
                 t            t             t
t                                           Outro solo - 3:17
clean with slapback delay                                      PH      whammy bar
