

# Ethan Bortnick - Sink And Die

tom:

Bb

90 Degrees, but I'm on a different plane  
 I saw some needs like sequel through cellophane  
 I brushed it off 'cause I thought it would end the same  
 The same as we did

Way above, past the captain's quarters  
 Knew it would break the ice, but let it move forward  
 I can't lie, this shit reminds me of when I was lied to  
 Why as I lied to?  
 I love the both of you

It changed my mind about you forever  
 I can't undo what y'all did together  
 And I can't watch you both sink and die

Try to keep it concise on my competitor  
 Meeting is right when it wasn't my fault  
 I was dragged to his house, called his dad a predator  
 Who pooped in a bag (Little fireman left)

Way above, past the captain's quarters  
 Knew it would break the ice, but let it move forward  
 I can't lie, this shit reminds me of when I was lied to  
 Why as I lied to?  
 I love the both of you

It changed my mind about you forever  
 I can't undo what y'all did together  
 And I can't watch you both sink and die

Sink and die  
 Sink and die  
 Sink and die  
 Sink and die

( A Dm A Dm )

When man first explored outer space  
 And eventually halted on our space race  
 Succeeding the Cold War  
 We learned more about the great beyond in our existence  
 One thing is for certain  
 If I were to fling you both into the galaxy  
 I would never have to deal with your shit, ever again
